Hi Chris,

I just forwarded this to Andy but wanted to keep you in the loop as well. I finally got around to reading this Tech Memo from CH2MHill describing the methylation issue at Steamboat Creek. I'm very late getting around to it--it sounds like Kristine will be making her decision any day now--but I'm not sure it really gives us any new information. I'm curious to know whether you think they provide any new valid points or not.

Cheers and I hope all is well with you,

Leana

Leana-

Attached is a memorandum put together by CH2M Hill after our conversations with RTC regarding mercury deposition and then Methylation in the Southern project area. Please let me know if you have any comments on this document.

I have not had an opportunity to review materials or make head way on the permit decision. I received temporary (120 days) help in my office last week that will allow me to do the review necessary to move forward, I anticipate a decision by mid June.
